

I strongly object to the consideration being made to enact changes to the NO CALL policy in Wisconsin. There is no organization which should have the right to call me at my private residence if I have expressly stated that those calls are unwelcome. Their rights end at my front door!! If people do not mind those calls, then the companies have every right to make them. However, I DO mind these calls, which interrupt important family time. DO NOT make it easier for companies, no matter how much money they may have, to invade my privacy.
